At Mr. Sommers's request, (stated in the conclusion on page 5 of the amendment dated 7/20/05) on 9/9/05 I called him to discuss the application and negotiate for allowability. A few days later he called back and left a voicemail message indicating that due to his schedule, he desires a written office action.

On page 4, line 8, "participate " should be changed to -are included-.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is the "slot" in line 6 of claim 5. It is not clear what are the "vertex" and "notch vertex" of claim 8. No clear antecedent basis is seen for "the oblique cut " in lines 1,2 of claim 9.

In response to this action, applicant is urged to identify each and every element of the claims with reference numerals from the drawings, with numerals in parentheses. Such numerals will aid in more easily following the claims and will help in avoiding mistakes, but will not in any way limit the scopes of the claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,6,7 as best understood, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dimitry et al (note fig. 3, split 45, a notch defined beneath numeral 47 and the right of numeral 22, and a similar notch defined below numeral 43, as best seen in figure 3; and col. 3, lines 49,52).

It appears that split 45 is the equivalent of applicant's slot (slit?) and the notches shown in figure 3 are the equivalent of the "notch " of claim 1.

Claims 10,11 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3673

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
